## **Zodiac Table**

## Notes:

- The (original) tropical zodiac originates with Babylonian astronomy nearly 3000 years ago. The zodiac signs were assigned according to where the sun was at that time, and divided them evenly into 12 segments starting with Aries on the first day of spring.

  The (modern) *sidereal zodiac* is shifted from the tropical zodiac by about 25 because the sun is now in a
- different position in the zodiac.
- The astronomical zodiac shows where the sun is in each constellation without dividing it equally.
